

Manifesto for the preservation of
Campo di Marte – Florence 2050

Campo di Marte has always served as an **important infrastructural tool** in the operation of the city of Florence, from its agricultural beginnings, through its early life as a military settlement, an aerial base, its temporary but fascinating life as a backdrop for film and performance, to its contemporary existence as an aggregation of sports facilities, whose footprints displace **potential connections and activities**.

We aim to **unleash Campo di Marte as a crucial component of green, car-free, pedestrian, accessible and inclusive, hyper-connected infrastructure.**

Campo di Marte is a dormant node which has the potential to **consolidate and protect the green network** of the city and its biodiversity. We foresee new green belts linking to Fiesole, over the Ferrovia Station and the railway tracks, **reuniting within Campo di Marte.**

Campo di Marte is an **opportunity to supply what the city is missing**: a void that needs only to be rediscovered.

CAMPO DI MARTE 2026 | Nevralgic Green Infrastructure
Satellite

PEDESTRIAN ACCESS | Viale Valscareggi Overlooking the Hills
Section BB 1:5000

RETREAT | Sunday Afternoon Picnic
Pocket view, secluded in the trees under Maratona

NEW PEDESTRIAN NEIGHBORHOOD | A walk through the Portico
Entering the garden from Viale M. Fantì

PLAYGROUND | Axial Permeability
View from Via Volturro

CAMPO DI MARTE GREEN NETWORK | From Boboli to the Fiesole
section AA 1:5000
